

## **chaima oui - Cover Letter**

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer position at XYZ Corp. As a highly motivated student in Software Engineering at TEK-UP University, I've been consistently developing skills relevant to modern web application development.

My experience includes significant work with Springboot, Angular, and API development, alongside projects utilizing technologies like Selenium and .NET - which I understand are valuable assets. While my resume highlights my expertise with technologies like Django and React, I am a quick learner and eager to expand my skillset within your team. I'm particularly drawn to the innovative projects I've worked on, including the development of platforms for ticket management and covoiturage.

I am confident that my dedication to creating robust and user-friendly solutions aligns well with XYZ Corp.'s values.

Sincerely, chaima oui
